This fact sheet presents various economic, social, and demographic indicators pertaining to the Latino population in the Springfield Metropolitan Statistical Area (MSA)¹ and, when required, compares the Springfield MSA with the state of Massachusetts overall and with the other main areas of large Latino concentration, namely, the Boston, Lawrence, and Worcester Primary Metropolitan Statistical Areas (PMSAs). In this fact sheet the term “Springfield” refers to the complete MSA and not just the city of Springfield. The information for this fact sheet comes from the U.S. Census Bureau’s American Community Survey of 2004.²

¹ A Metropolitan Statistical Area is a unit used by the U.S. Census but which is determined by the Office of Management and Budget. It is an area associated with at least one urbanized center with a population of at least 50,000 and which comprises a central county or counties (core) plus adjacent counties having a high degree of social and economic integration. The Primary Metropolitan Statistical Areas (PMSAs) are the same as MSAs except that they are near (and economically/socially linked to) other PMSAs to form larger “CMSAs” – Consolidated Metropolitan Statistical Areas that have a population of 1 million or more.
